Art Unit: 1711

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Polymerizable compounds of Formula I defined by the variables R^1 , R^2 , R^3 , R^4 , R^6 , $R^{6'}$, $R^{6''}$, P, Sp, Q, X, L^1 , k, n, and p;

Polymerizable compounds of Formula II defined by the variables P, Sp, X, R^{21} , A^{31} , A^{32} , A^{33} , Z^{31} , Z^{32} , m, and n; and

Polymerizable compounds of Formula III defined by the variables P, Sp, X, A^{41} , A^{42} , A^{43} , A^{44} , Z^4 , R^{41} , and n, wherein the definitions of the variables are set forth within claims 1, 3, 5, 6, and 8.

Applicant is required, in reply to this action, to elect a single clearly defined species for each variable set forth above for each of Formulas I, II, and III to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Claims 1-15 are deemed to correspond to the species listed above.

Art Unit: 1711

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each species yields a distinct chemical structure, and they are not considered to be obvious variants.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
5. Given the number of Formulas, variables, and species per variable, a telephonic election was not attempted.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to R. Sergent whose telephone number is (571) 272-1079.
